UML Class, Use Case and Activity Diagrams for an Online Food Delivery System.

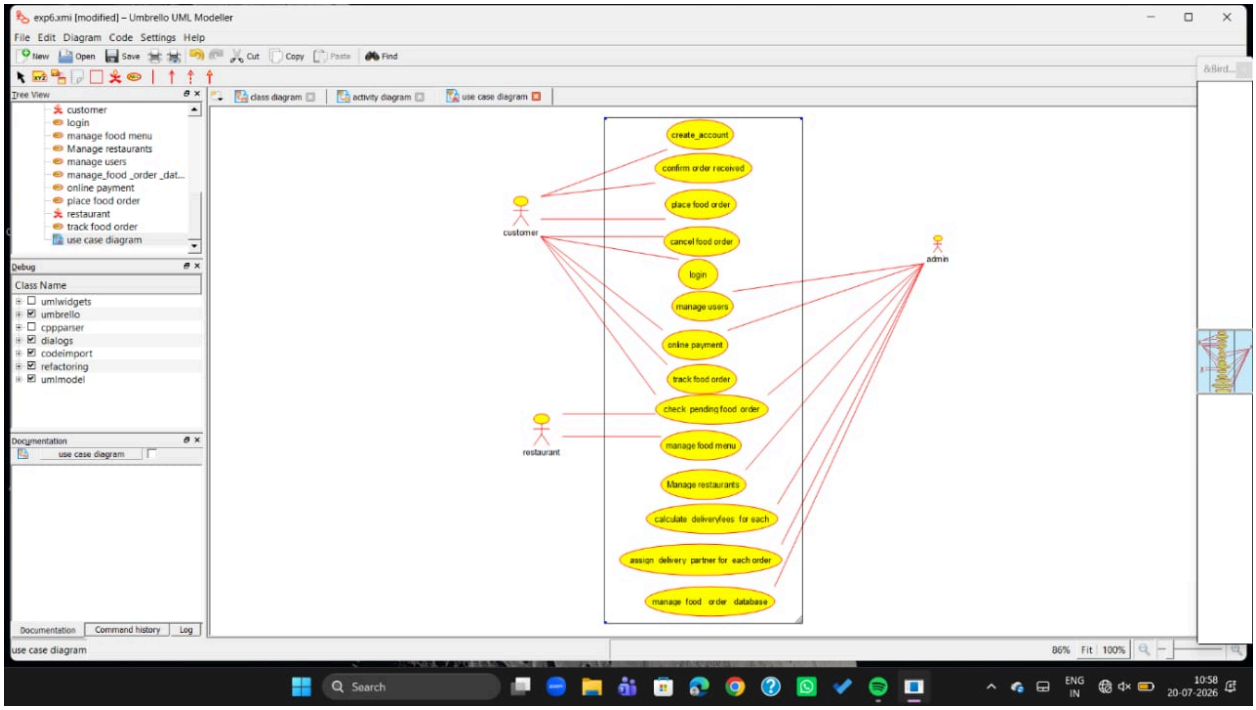

AIM: To design UML Class Diagram, Use Case Diagram and Activity Diagram for an Online Food Delivery System using Umbrello software.

PROCEDURE:

- Open the Umbrello UML Modeller software.
- Create a new project and save it as Online Food Delivery System.
- Select the Class Diagram from the Logical View.
- Create classes such as Customer, Restaurant, Food, Order, Payment and Delivery.
- Add suitable attributes and methods to each class and connect them using relationships.
- Select Use Case Diagram and create actors such as Customer, Restaurant, Admin and Delivery Person.
- Add use cases such as Login, Register, Browse Food, Place Order, Make Payment and Track Order.
- Connect the actors with their related use cases using association lines.
- Select Activity Diagram and create activities such as Login, Select Food, Add to Cart, Place Order, Make Payment and Deliver Food. Connect them using arrows.
- Save all three diagrams in the Umbrello project.

OUTPUT:

RESULT:

Thus, the UML Class Diagram, Use Case Diagram and Activity Diagram for the Online Food Delivery System were successfully designed using Umbrello software.
