UML Diagrams for a College Security Management System.

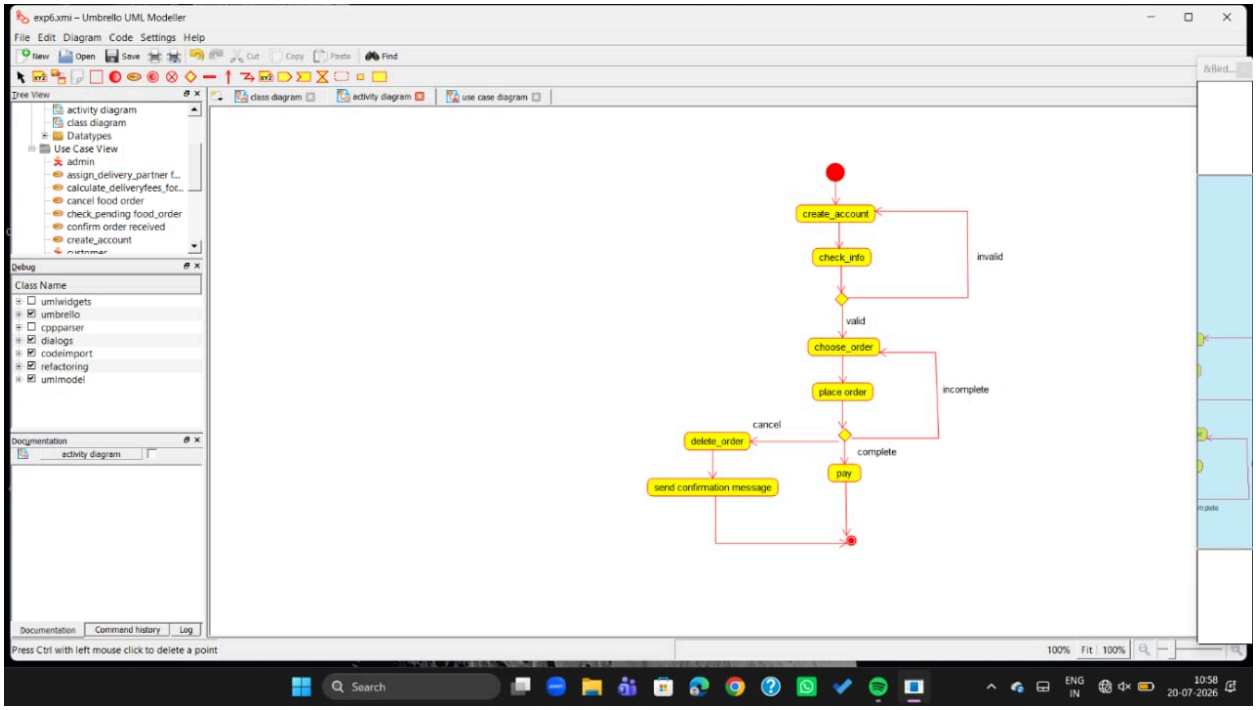

AIM: To design UML Class Diagram, Use Case Diagram and Activity Diagram for a College Security Management System using Umbrello software.

PROCEDURE:

- Open the Umbrello UML Modeller software.
- Create a new project and save it as College Security Management System.
- Select Class Diagram from the Logical View.
- Create classes such as Student, Security Guard, Admin, Visitor, Vehicle and Entry Record.
- Add suitable attributes and methods to each class and connect them using relationships.
- Select Use Case Diagram and create actors such as Student, Security Guard, Admin and Visitor.
- Add use cases such as Login, Register Visitor, Verify Identity, Check Entry, Manage Security and Generate Report.
- Connect the actors with their related use cases using association lines.
- Select Activity Diagram and create activities such as Start, Login, Verify Identity, Check ID Card, Allow Entry or Reject Entry, and End.
- Connect all activities using arrows and save all three UML diagrams.

OUTPUT:

RESULT:

Thus, the UML Class Diagram, Use Case Diagram and Activity Diagram for the College Security Management System were successfully designed using Umbrello software.
